## Universal healthcare

Healthcare is a human right. I'll work with allies in the legislature to pass the Washington health trust - universal, single payer, nonprofit health coverage for every state resident

## Universal Childcare

Following in the footsteps of New Mexico, we can guarantee effective, affordable childcare for every parent or guardian

## Universal Housing

The ongoing housing shortage is the direct result of a profit-focused housing market. We must begin mass construction of housing that can be sold to residents at cost-price to make housing affordable for everyone

## Worker's Rights

Creating strong legislation that protects unionization, workplace democracy, and ensures that everyone that works full time can afford to live comfortably

## Progressive Taxes

Abolishing regressive tax policies like sales taxes and point-of-service fees, and replacing them with a progressive income and capital gains tax will ensure that the burden of taxation doesn't rest on the working class

## Bodily Autonomy

Ensuring continued access to all forms of family planning services and gender affirming care is a critical part of maintaining our freedom to choose what happens to our own bodies
